By C. W. HARTNETT.

"An article of domestic importance. .....Nothing can be simpler—nothing more profound."—*Daily News* 8th ult.

"That dismissible pest, a smoky chimney, has here met with its match." &c.—*Sunday Times* 14th ult.

London: Messrs. WILLSHIRE and HARTNETT, 33, Grosvenor-row, Pimlico.

ORNAMENTAL TILING for ROOFS.—The Society of Arts awarded Mr. ROBERT BROWN a Medal for his improved Italian Tiles, and in the Great Exhibition of 1851 they were awarded a Prize Medal, and were the only Italian tiles specifically named by the Jury. These tiles have been used by Sir CHARLES BARRY, and other architects, and have met their marked approval; they have also received the approval of eminent men in many parts of Europe. The slight curve used in the new tiles to be fitted closely together without mortar or cement. The horizontal indentation forms a perfect security against the driving rains: when on a building, they have the exact appearance of the most admired form of Italian tiling. The grey or green colour is burnt in, and is permanent. They are supplied at a stated price per square.

ORNAMENTAL PLAIN TILES, in great variety, made from the Surbiton clay, and also from the Staffordshire terro-metallic clays, at per square.

PLAIN and GOTHIC RIDGE TILES, HOP and VALLEY TILES, and COPING BRICKS.

The GROOVED RIDGE TILE, for the reception of any varied outline of vertical ornament, was invented by Mr. Robert Brown, and for which invention he also received from the Society of Arts a medal. He now makes these tiles, of any desired colour, from the Surbiton clay, as also from the Staffordshire terro-metallic clay. He has lately devoted great attention to the varied conditions of form so as to adapt them to the different periods of Gothic Architecture. The attention of architects is particularly invited to those ridge tiles of a green colour. They are supplied at a stated price per foot run. Mr. Robert Brown trusts that architects who consider the Grooved Ridge Tile worthy of introduction, will think it but fair and honourable that the inventor should supply them, provided he does so as cheaply and well as any other party. But should even this hope not be realised, he will still have the satisfaction of having been the inventor of an article which has become of universal adoption.

TILE WORKS, SURBITON-HILL, SURREY.
